

Practical AI For Busy Teachers

Online AI training written with teachers, for teachers.

AI can help teachers save time, strengthen their practice and create better learning experiences when it is used **thoughtfully, responsibly and effectively**.

This practical, self-paced course helps teachers make AI a genuinely useful part of their everyday work. It supports teachers to reduce repetitive tasks, create stronger teaching resources and **reclaim time for teaching, creativity and connection**.

6 hours | 6 modules | 33 practical lessons | Self-paced online

Why support your teachers to take this course?

The course gives schools a **consistent, documented approach to building responsible staff AI capability**, with clear learning outcomes, mapped Standards and evidence of completion.

Save time

Practical ways to use AI for lesson planning, resource creation, differentiation, assessment and administration.

Build confident, responsible capability

Strong habits around privacy, verification, bias and professional judgement, supporting safe, effective classroom use.

Apply learning immediately

Every module is grounded in real teaching tasks, so participants use what they learn as they progress.

Credible, Standards-aligned professional learning

This six-hour course is aligned with the **Australian Professional Standards for Teachers** and can support registration and professional learning requirements across all Australian states and territories.

Australian teachers can log the course against the relevant Standards and retain their completion certificate as evidence. In **New Zealand**, the course is mapped to **Ngā Paerewa** and can support teachers' Professional Growth Cycle.

Participants receive a **Certificate of Completion** documenting six learning hours, outcomes and relevant Standards.

Fambirai is a NSW Education Standards Authority (NESA) Recognised Provider.

Participants will learn how to:

- **Plan faster** by turning curriculum content into clear learning intentions and activities
- **Differentiate** materials for different reading levels and student needs
- **Create** rubrics, retrieval activities and assessment resources
- **Refine** AI-generated content to match their own voice and school context
- **Reduce** time spent on repetitive planning and administrative tasks
- **Check** AI output for accuracy, privacy concerns and bias

What's included

- 33 practical lessons across 6 modules
- Self-paced online learning
- Interactive lessons and knowledge checks
- Downloadable resources
- Ongoing access to revisit the course
- Certificate of Completion after passing the final assessment, documenting six hours of professional learning and the relevant Standards addressed

Who's it for? Primary and secondary teachers at any career stage. No advanced technical knowledge required.

Designed and tested with practising teachers. The course was developed in consultation with teachers working across different year levels, locations and levels of AI experience.

4.8/5

Average usefulness rating from teacher reviewers

100%

Of reviewers would recommend the course

"A great course for school teaching staff to ensure a uniform approach to AI in the school.

The self-paced aspect is convenient for busy teachers."

— Katie Pidgeon, Teacher
